Why This Guide Exists

Most small businesses know AI can help, but translating that into specific, everyday time savings is harder than it sounds.

This guide skips the hype. It's a practical list of 25 real tasks — the kind that quietly eat hours out of every week — and how AI can take them off your plate.

You don't need to implement all 25. Pick the two or three that match your team's biggest time drains, and start there.

Your time:	About 15 minutes to read
Tips included:	25, grouped into 5 categories
Your result:	A shortlist of quick wins for your team

How to Use This Guide

- Skim the five categories and flag the tasks that eat the most time on your team today.
- Try one tip this week before moving to the next — small wins build momentum.
- Track the hours saved. It builds the case for further AI adoption across your business.
