Is Your Business ADA / WCAG Compliant?

A 5-Point Quick Check

Web accessibility lawsuits have risen sharply in recent years. Most businesses don't know they're exposed until it's already a legal problem. WCAG 2.1 Level AA is the practical baseline most businesses should target.

- [ ] Every image on your site has descriptive alt text.
- [ ] Text and background colors meet contrast standards (WCAG 2.1 AA).
- [ ] Every page is fully navigable using only a keyboard — no mouse required.
- [ ] All form fields have clear, readable labels.
- [ ] Videos include captions or transcripts.

If you checked “no” or “not sure” on any of these,
let's talk before it becomes a legal problem.

Let's talk about what's next.
